

## IMPERIAL FISTS SPACE MARINE ARMY LIST

*“Primarch-Progenitor, to your glory and the glory of him on earth!”*

### Forces

The Imperial Fists Space Marine Army List uses the datasheets from the Imperial Fist Forces section.

### Using The Army List

The following army list allows you to field an army based on a Imperial Fists Space Marine army. It can also be used as a “stand in” army list for any of the Imperial Fists’ successor chapters.

Space Marines are organised into small formations called *detachments*. Each detachment is made up of one or more units, and may also include a number of extra units called *upgrades*.

The detachments that may be taken in a Imperial Fists army are shown on the chart that follows. The chart also shows what units comprise the detachment, what upgrades are allowed, and its points cost.

Each upgrade that is taken adds to the cost of the detachment, as shown on the *upgrade chart*. The upgrade chart also lists the units that make up the upgrade. Note that these will sometimes replace units in the detachment they are taken for, and sometimes takes the form of additional units for the detachment. Each upgrade may be taken once per formation.

Imperial Fist armies may be supported by Titan Legion battlegroups, and Imperial Fist aircraft and static defence formations. A maximum of up to a third of the points available to the army may be spent on these formations.

### Special Rules

The *They Shall Know No Fear* rule applies to all Imperial Fist detachment, aircraft and static defence formations (see *They Shall Know No Fear*). The *Fortified Positions* rule applies to Imperial Fist Space Marine armies (see *Fortified Positions*).

### SPECIAL RULE

#### *Imperial Fists Transport*

The Space Marines are a highly mobile army. Because of this, the points cost of a detachment usually includes enough Rhino transport vehicles to transport it and any upgrades that have been taken. Determine the number of Rhinos needed after all upgrades have been purchased. The number of Rhinos will always be the minimum needed to carry the formation, you can’t take extras along to cover any losses!

Note that many formations don’t receive Rhinos, usually because they can’t fit into them. Detachments that come with Rhinos will be noted as having “plus transport” in the units section of the detachment list below.

In addition you may choose to replace a Devastator or Tactical detachment’s Rhinos with two Bunkers and 50cm of Trenches or Minefields before each game, after the opposing army is known but before objectives are placed.

### SPECIAL RULE

#### *Fortified Positions*<sup>1</sup>

Fortified positions must be set up after objectives have been placed but before spacecraft and garrisons are set up. The only exception to this are fortified positions that are listed as part of a formation’s “units”. While they are not actually units, they are set up with the formation they are part of.

Fortified positions may be set up anywhere a vehicle may deploy on the player’s half of the table. They may not be transported. Each group of fortified positions (whether part of a formation or not) must be set up so every piece is within 5cm of another piece from the same group, and so all pieces from the same group form a “chain” without any gaps of more than 5cm. Additionally, if a group of fortified positions is part of a formation then at least one piece must be within 5cm of a unit from the formation when they are set up.

Once set up, fortified positions may be used by any unit (including enemy units).

1. Fortified Positions

Q: Do all Fortified Positions purchased need to be set up?

A: No.

Q: Are Fortified Positions counted during tiebreak?

A: No.

Q: Are the Gun Emplacements that come with certain formations set up at the same time as Fortified Positions?

A: No, these are setup with the formation they are part of.

Q: Are the Gun Emplacements that come with certain formations in the formation?

A: No, they are not units. They just need to be set up in coherency with the rest of the formation.

## IMPERIAL FISTS SPACE MARINE ARMY LIST

Imperial Fist Space Marine armies have a strategy rating of 5. Imperial Fist static defence formations have an initiative rating of 2+. All other formations have an initiative rating of 1+.

IMPERIAL FIST DETACHMENTS

### SPECIAL RULE

#### *They Shall Know No Fear*<sup>2</sup>

Space Marines are renowned for their tenacity and bravery. This is represented by the following rules:

- It takes 2 Blast markers to suppress a Space Marine unit or kill a unit in a broken formation (ignore any leftover Blast markers).
- Space Marine formations are only broken if they have 2 Blast markers per unit in the formation.
- Space Marines formations only count half their number of Blaster markers in assault resolution (rounding down—note that assault resolution will not receive +1 for having no Blast markers if the formation has 1 Blast marker before rounding down). Halve the number of extra hits suffered by a Space Marine formation that loses an assault, rounding down in favour of the Space Marines.
- When a broken Space Marine formation rallies, it receives a number of Blast markers equal to the number of units, rather than half this number. Space Marines with the Leader special ability remove 2 Blast markers instead of 1.

#### 2. They Shall Know No Fear

Q: How many Blast markers does a broken Space Marine unit count as having when working out the result of an assault?

A: One per unit.

### SPECIAL RULE

#### *Masters of Siege*

The Imperial Fists have a special expertise in siege warfare and mass shock assaults. This is represented by the following rules:

- An Imperial Fists army may start three garrisoned formations on overwatch instead of two.
- All units count as having *walker* when making a dangerous terrain test for entering or starting to move on minefields that have been purchased as part of the army.
- All infantry units gain *first strike* when within trenches purchased as part of the army.
- All infantry units gain a 4+ save with *reinforced armour* when within bunkers purchased as part of the army. This replaces both their regular save and the 3+ bunker cover save. This save is lost if the unit suffers an *ignore cover* hit.

### SPECIAL RULE

#### *Imperial Fist Fortified Positions*

**Bunker:** Counts as Fortifications (see Terrain Effects). Can hold three units. Units in a bunker may not be barged by a war engine.

**Gun Emplacement:** Provides vehicles with a Cover Save that works in the same manner as an infantry cover save (see Infantry Cover Saves). Can hold one unit. Units in a gun emplacement may not be barged by a war engine.

**Minefield:** Enemy units with *Jumps Packs* or *Skimmer* must take dangerous tests for Minefields. Enemy units may not re-roll failed dangerous terrain tests for minefields.

**Trench:** Can hold one infantry unit per 4cm of length. Units in a trench may not be barged by a war engine.

#### Fortified Position Effects Table

<i>Terrain</i>	<i>Infantry</i>	<i>Vehicle</i>	<i>War Engine</i>
Bunker	3+ Cover Save	Dangerous	Dangerous
Gun Emplacement	4+ Cover Save	5+ Cover Save	No Effect
Minefield	Dangerous	Dangerous	Dangerous
Trench	4+ Cover Save	Dangerous	No Effect

### SPECIAL RULE

#### *Automata*

Formations that are comprised completely of units with *automata* may only carry out marshal, overwatch and sustained fire actions. They also cannot capture objectives in the Epic tournament game rules.

Formations that include at least one unit **without** automata do not receive a Blast marker when a unit with automata is destroyed, this includes the extra Blast marker from the first casualty of a crossfire and for units destroyed for being out of formation after a move. Also, if an automata unit is hit by a weapon with disrupt it does not inflict a Blast marker. Finally, don't count units with automata that are lost in an assault when working out who has won the combat.

**SPECIAL RULE**  
***Imperial Void Shields***<sup>3</sup>

Imperial Titans are protected by void shield generators. The number of void shields each Titan has is noted on the Titan's datasheet.

Each void shield will automatically stop one point of damage and then go down. Do not make armour saves for damage stopped by void shields, nor allocate Blast markers. Once all of the shields have been knocked down, the Titan may be damaged normally and you may make saving throws against any hits that are scored. Hits from close combat ignore void shields but units using their firefight values must first knock down any shields before they can damage the Titan.

Void shields that have been knocked down can be repaired. Each Titan can repair one downed void shield in the end phase of each turn. In addition, if a Titan regroups it can use the dice roll to either repair the void shield or remove Blast markers (e.g., if you rolled a 2 you could repair 2 shields, remove 2 Blast markers or repair 1 shield and remove 1 Blast marker).

---

3. Imperial Void Shields

Q: Do void shields stop a point of damage caused by: a failed dangerous terrain test, the extra hits from the result of an assault, a Blast marker on a broken formation, or the unit ending its second withdrawal move within 15cm of the enemy?

A: No.

Q: How many void shields go down if a war engine is hit by a Titan Killer weapon that causes multiple points of damage?

A: One per each point of damage, with any left over being allocated to the unit.

Q: Can a formation regroup to repair downed void shields if it has no Blast markers?

A: Yes.

Q: If a formation with multiple units with void shields regroups is the number of repaired void shields the same for each unit or shared between them?

A: Shared between them, e.g. if you chose to repair two void shields, one unit could repair two void shields or two units could repair one void shield each.

Q: Are void shields considered when determining how many hits a war engine should be allocated?

A: No.
