

RAVEN GUARD SPACE MARINE ARMY LIST

“Victorus Aut Mortis!”

Battle Cry of the Raven Guard Chapter

Forces

The Raven Guard Space Marine Army List uses the datasheets from the Raven Guard Forces section, the Imperial Navy Forces section, and the Titan Legion Forces section.

Using The Army List

The following army list allows you to field an army based on the Raven Guard, or one of their successor chapters, using their preferred operational methods.

Raven Guard formations come in three types: *detachments*, *elite detachments* and *support detachments*. Each formation is made up of one or more units, and may also include a number of extra units called *upgrades*. Each detachment you include in the army allows you to field any one elite detachment and any one support detachment. Although you can only take elite and support detachments if you first take a detachment, they are treated as separate independent formations during a battle and do not have to move around together.

The formations that may be taken in a Raven Guard army are shown on the charts that follow. The charts also show what units comprise them, what upgrades they are allowed, and their points cost. For example, an Assault detachment consists of four Space Marine Assault units for 175 points, and may include the Commander and Land Speeders upgrades at an additional cost in points.

Each upgrade that is taken adds to the cost of the formation, as shown on the *upgrades* chart. The upgrades chart also lists the units that make up the upgrade. These can replace units in the formation they are taken for or be additional units added to the formation. Each upgrade may be taken once per formation. For example, an Assault detachment could include one Commander and make the cost of the formation 225 points (175 + 50).

Raven Guard armies may be supported by Imperial Navy aircraft, Raven Guard aircraft and Titan Legion battlegroups formations. A maximum of a third of the points available to the army may be spent on these formations.

Special Rules

The *They Shall Know No Fear* rule applies to all Raven Guard formations (see *They Shall Know No Fear*).

SPECIAL RULE

Raven Guard Transport

The Raven Guard are a highly mobile army. Because of this, the points cost of certain formations includes enough Rhino transport vehicles to transport it and any upgrades that have been taken. Determine the number of Rhinos needed after all upgrades have been purchased. The number of Rhinos will always be the minimum needed to carry the formation, you can't take extras along to cover the loss of other transports.

Formations that come with Rhinos will be noted as having “plus transport” in the units section of the army list. Raven Guard formations must take transport vehicles, you cannot leave them behind in order to garrison the formation. You can only choose to ignore this if the formation is entering play via a special rule (e.g. planetfall or self planetfall) or an aircraft.

You may choose to replace a formation's Rhinos with Drop Pods before each game, after the opposing army is known but before objectives are placed. Formations making a planetfall via Drop Pods (or by another unit with that ability) may be upgraded with Land Speeders, these are assumed to make planetfall alongside the infantry and do not need to be transported by Drop Pods or another unit with planetfall.

RAVEN GUARD SPACE MARINE ARMY LIST

Raven Guard Space Marine armies have a strategy rating of 5. Imperial Navy aircraft formations have an initiative rating of 2+. All other formations have an initiative rating of 1+.

RAVEN GUARD DETACHMENTS			
FORMATION	UNITS	UPGRADES	COST
Assault	Four Assault units	Commander, Land Speeders	175 points
Devastator	Four Devastator units plus transport	Commander, Hunter, Land Speeders, Razorbacks	250 points
Scout	Four Scout units plus transport	Commander, Land Speeders, Storms, Snipers	150 points
Tactical	Four Tactical units plus transport	Commander, Hunter, Land Speeders, Razorbacks	200 points

RAVEN GUARD ELITE DETACHMENTS			
<i>(Any one elite detachment may be fielded per each detachment.)</i>

Then any troops carried in the drop pod must disembark within 5cm of the drop pod or within 5cm of another unit from the same formation that has already landed, so long as all units are placed within 15cm of the drop pod. Drop pod models should be removed from the board once the formation they transport has disembarked.</i>

SPECIAL RULE

*They Shall Know No Fear*¹

Space Marines are renowned for their tenacity and bravery. This is represented by the following rules:

- It takes 2 Blast markers to suppress a Space Marine unit or kill a unit in a broken formation (ignore any leftover Blast markers).
- Space Marine formations are only broken if they have 2 Blast markers per unit in the formation.
- Space Marines formations only count half their number of Blaster markers in assault resolution (rounding down—note that assault resolution will not receive +1 for having no Blast markers if the formation has 1 Blast marker before rounding down). Halve the number of extra hits suffered by a Space Marine formation that loses an assault, rounding down in favour of the Space Marines.
- When a broken Space Marine formation rallies, it receives a number of Blast markers equal to the number of units, rather than half this number. Space Marines with the Leader special ability remove 2 Blast markers instead of 1.

1. They Shall Know No Fear

Q: How many Blast markers does a broken Space Marine unit count as having when working out the result of an assault?

A: One per unit.

SPECIAL RULE *Imperial Void Shields*²

Imperial Titans are protected by void shield generators. The number of void shields each Titan has is noted on the Titan's datasheet.

Each void shield will automatically stop one point of damage and then go down. Do not make armour saves for damage stopped by void shields, nor allocate Blast markers. Once all of the shields have been knocked down, the Titan may be damaged normally and you may make saving throws against any hits that are scored. Hits from close combat ignore void shields but units using their firefight values must first knock down any shields before they can damage the Titan.

Void shields that have been knocked down can be repaired. Each Titan can repair one downed void shield in the end phase of each turn. In addition, if a Titan regroups it can use the dice roll to either repair the void shield or remove Blast markers (e.g., if you rolled a 2 you could repair 2 shields, remove 2 Blast markers or repair 1 shield and remove 1 Blast marker).

2. Imperial Void Shields

Q: Do void shields stop a point of damage caused by: a failed dangerous terrain test, the extra hits from the result of an assault, a Blast marker on a broken formation, or the unit ending its second withdrawal move within 15cm of the enemy?

A: No.

Q: How many void shields go down if a war engine is hit by a Titan Killer weapon that causes multiple points of damage?

A: One per each point of damage, with any left over being allocated to the unit.

Q: Can a formation regroup to repair downed void shields if it has no Blast markers?

A: Yes.

Q: If a formation with multiple units with void shields regroups is the number of repaired void shields the same for each unit or shared between them?

A: Shared between them, e.g. if you chose to repair two void shields, one unit could repair two void shields or two units could repair one void shield each.

Q: Are void shields considered when determining how many hits a war engine should be allocated?

A: No.
