

IRON WARRIORS CHAOS SPACE MARINE ARMY LIST

“Iron Within, Iron Without!”

Battle Cry of the Iron Warriors

Forces

The Iron Warriors Chaos Space Marine Army List uses the datasheets from the Iron Warrior Forces section.

Using The Army List

The following army list allows you to field an Iron Warriors army.

Iron Warrior formations come in three types: *retinues*, *siege support formations* and *siege assault formations*. Each retinue you include in the army allows you to field any two siege support formations and any one siege assault formation. Although you can only take a siege support or assault formation if you first take a retinue, they are treated as separate independent formations during the battle and do not have to move around together.

In addition, formations may be given up upgrades but each upgrade may only be taken once per formation. Which upgrades a formation may be given are listed in the “Upgrades” column. Upgrades are added to the formation and are not a separate formation. Each upgrade that is taken adds to the cost of the formation, as shown on the upgrade chart.

Iron Warrior armies may be supported by Chaos Navy and War Engine formations. Up to a third of the points available to the army may be spent on these formations.

Finally, Iron Warrior Individuals includes the Warsmith special character. Each individual may only be taken once by the army. The rules for using each individual are listed in the “Notes” column.

SPECIAL RULE

Fortified Positions¹

Fortified positions must be set up after objectives have been placed but before spacecraft and garrisons are set up. The only exception to this are fortified positions that are listed as part of a formation’s “units”. While they are not actually units, they are set up with the formation they are part of.

Fortified positions may be set up anywhere a vehicle may deploy on the player’s half of the table. They may not be transported. Each group of fortified positions (whether part of a formation or not) must be set up so every piece is within 5cm of another piece from the same group, and so all pieces from the same group form a “chain” without any gaps of more than 5cm. Additionally, if a group of fortified positions is part of a formation then at least one piece must be within 5cm of a unit from the formation when they are set up.

Once set up, fortified positions may be used by any unit (including enemy units).

1. Fortified Positions

Q: Do all Fortified Positions purchased need to be set up?

A: No.

Q: Are Fortified Positions counted during tiebreak?

A: No.

Q: Are the Gun Emplacements that come with certain formations set up at the same time as Fortified Positions?

A: No, these are setup with the formation they are part of.

Q: Are the Gun Emplacements that come with certain formations in the formation?

A: No, they are not units. They just need to be set up in coherency with the rest of the formation.

Dreadclaw Special n/a n/a n/a n/a -

Planetfall, Transport. May transport one formation of infantry units (except Chaos Space Marine Bikes) and Chaos Dreadnoughts. The Dreadclaw does not scatter 2d6cm after being placed within 15cm of the drop zone co-ordinates recorded at the start of the game (see Planetfall). Any troops carried in the Dreadclaw must disembark within 5cm of the Dreadclaw or within 5cm of another unit from the same formation that has already landed, so long as all units are placed within 15cm of the Dreadclaw. Dreadclaw models should be removed from the board once the formation they transport has disembarked.

SPECIAL RULE
Iron Warrior Fortified Positions

Gun Emplacement: Provides vehicles with a Cover Save that works in the same manner as an infantry cover save (see Infantry Cover Saves). Can hold one unit. Units in a gun emplacement may not be barged by a war engine.
